

Sayan Sasmal

Kolkata, West Bengal, 721136 — mr.sayansasmal18@gmail.com -8167753469

[LinkedIn](#) — [GitHub](#)

Profile Summary

Aspiring Data Scientist with hands-on experience in Data Analysis, Data Visualization, Big data and Machine Learning. Skilled in transforming complex datasets into actionable insights using Python, SQL, Excel, and Power BI. Adept at building predictive models, interpreting trends, and delivering business-focused solutions.

Education

College of Engineering & Management, Kolaghat

B.Tech in Computer Science & Engineering - CGPA: 7.83/10

Sept 2022 – June 2026

Ramakrishna Mission Vidyabhavan, Medinipur

Higher Secondary (XIIth) - WBCHSE - 86.2%

April 2022

Bikrampur High School(H.S.)

Secondary (Xth) - WBBSE - 93.43%

March 2020

Technical Skills

Languages: Python, SQL, Java

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow

ML/DL: Neural Network, Logistic Regression, SVM, KNN, Random Forest, Naive Bayes

NLP: TF-IDF, Text Cleaning, Feature Extraction

Big Data & Deployment: Apache Hadoop, Apache Spark, Azure Databricks, AWS

Tools: Power BI, Excel, Jupyter, Google Colab, GitHub, VS Code

Concepts: EDA, Data Cleaning, Supervised Learning, Classification

Database: MySQL

Experience

Indian Institute of Technology, Kharagpur

Dec 2024 – Present

Research Intern

- Worked on Edge Computing and Deep Learning, exploring Neural Network models.
- Contributed to efficient computational models and intelligent system development.

Unified Mentor

May 2025 – July 2025

Data Analyst Intern

- **TCS Stock Data** : Processed live stock data to track performance trends.
- **Netflix Data Analysis** : Analyzed the Netflix dataset to find insights about content trends, genres, and ratings.

Projects

Skin Disease Detection using CNN

[GitHub](#)

- Built a CNN model in Tensorflow to classify skin diseases from images.
- Optimized the model architecture and used data augmentation for improved accuracy and efficiency.

Fake News Detection System

[GitHub](#)

- Built a machine learning model to classify news articles as real or fake using NLP techniques.
- Gained hands-on experience in NLP pipelines, feature extraction (TF-IDF), and binary classification tasks.

IBM HR Analytics

[GitHub](#)

- Analyzed IBM employee attrition data to uncover trends in job roles, income, work-life balance etc.
- Designed a professional Power BI dashboard with KPIs and interactive visuals using IBM-branded themes.

TCS Stock Price Prediction

[GitHub](#)

- Built a regression-based machine learning model to predict TCS stock prices using historical market data.
- Performed EDA, feature engineering (moving averages, lag features), and model evaluation (R^2 , RMSE, MAE).

Certifications

Certificates

- **Machine Learning – NPTEL** : Covered ML algorithms, Deep Learning, CNN.
- **Database Management Systems – NPTEL** : Covered relational models, normalization, SQL.
- **SQL (Basic) – HackerRank** : Demonstrated SQL fundamentals.
